FOREWORD

The Maryland Council for Higher Education has the legal responsibility to secure, evaluate, compile and tabulate data, statistics and information dealing with all aspects of higher education. In order to carry out this responsibility, the Council conducts an annual higher education information survey which gathers data on students, faculty, facilities, finance, and programs from all of the higher education institutions in the State of Maryland. This Data Book is a summary of selected information for the 1972-73 academic year tabulated by each major segment of higher education within the public sector -- Community Colleges, State Colleges, and University, and the private sector.

The tables included in this Data Book are intended to be informational and not interpretive; however, the data contained in this report are used by the Council and State officials in assessing the current status of higher education in Maryland and in making recommendations for action for improvement of higher education. The reader should be cautioned that conclusions drawn from comparative data may be misleading, and additional analysis is usually required before differences can be fully understood. The most constructive use of these data is realized not by drawing conclusions from them but by using them as a source for pointing up areas for further detailed investigation and analysis.

The Council wishes to point out that much of the data contained in this publication are being presented for the first time in a format which shows both major fields of study and student level. This format is the result of the implementation of a degree program taxonomy structure by the Council, and the classification of degree programs by every higher education institution in the State. The complete inventory of degree programs in the State of Maryland is available from the Council in another publication.
